Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values--Urban Household Assets, Expenditure, Income, and Conditions Data (Survey Appendix)

Variable Name and Label (Total Cases = 6835)		Percent of Cases with Missing Values
96.7% (205 of 212 variables)	have 0% Missing Values	
0.0% (0 of 212 variables)	have 0% - 1% Missing Values	
2.8% (6 of 212 variables)	have 1% - 3% Missing Values	
0.0% (0 of 212 variables)	have 3% - 5% Missing Values	
0.0% (0 of 212 variables)	have 5% - 10% Missing Values	
0.0% (0 of 212 variables)	have 10% - 20% Missing Values	
0.0% (0 of 212 variables)	have 20% - 40% Missing Values	
0.5% (1 of 212 variables)	have 40% - 99% Missing Values	
B29	Rent for leasehold housing (Yuan)	83.4%
0.0% (0 of 212 variables)	have 100% missing values

Data and Variable Label Problems

Part 4

The materials provided by the Principal Investigators were insufficient to conclusively determine the meaning of all of the variables and values in this study. This is a list of problems or potential problems identified by the ICPSR processor. Where it is relevant, the action taken by the processor (such as marking inappropriate values as missing) is also listed.

Variable Names in Datafile	Problems Identified
various	The questionnaire says that missing values are coded as 1.9, but there are no instances of 1.9 values in the data.
various	The data contain zeros which don't make sense unless they are missing values. (They have been marked as missing.)
b213, b214, b215, b216, b217, b24, b25, b27	No value labels given in the questionnaires.
b26	It is unclear how these numbers represent years.
b27	It is unclear what this variable measures or what the values represent.
b28, b210	Zeros don't seem to represent actual property values of zero, since there are cases with positive values for potential rent but zero for potential market price. These should probably be treated as missing values.
b211	It is unclear how these numbers represent years.
b31, d92, d920, d921, d9211, d9212, d922, d923, d924, d93, d94, d95, d951, d9511, d9512, d9513, d9514, d9515, d9516, d9517, d9518,	Variables not found in questionnaire.
e111_1, e111_2	Questionnaire contains only "e111." The values in these two variables seem to correlate, but they are not identical.
e153_1, e153_2	Questionnaire contains only "e153." The values in these two variables seem to correlate, but they are not identical.
f721_1, f721_2	Questionnaire contains only "f721." The values in these two variables seem to correlate, but they are not identical.
f722_1, f722_2	Questionnaire contains only "f722." The values in these two variables seem to correlate, but they are not identical.
f514, f522	Based on context, I guessed that these were "expenditure on transportation" and "expenditure on communication," respectively, but the questionnaire does not label either one.
pop2003, pop2002, errtype1	These variables were not found in any questionnaire, nor could they be labeled intuitively.

Variable Names in Codebook	Problems Identified
B218	This variable appears in the questionnaire amongst many variables from the part 4 dataset, but it does not appear in the data.
