### **Terms of Use**

The terms of use for this study can be found at: http://www.icpsr.umich.edu/cocoon/ICPSR/TERMS/21741.xml

### **Data Completeness Report**

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values--Urban Individual Annual Income Data (Survey Appendix)

Variable Name and Label (Total Cases = 27818)		Percent of Cases with Missing Values
15.9% ( 7 of 44 variables)	have 0% Missing Values	
77.3% ( 34 of 44 variables)	have 0% - 1% Missing Values	
0.0% ( 0 of 44 variables)	have 1% - 3% Missing Values	
0.0% ( 0 of 44 variables)	have 3% - 5% Missing Values	
0.0% ( 0 of 44 variables)	have 5% - 10% Missing Values	
0.0% ( 0 of 44 variables)	have 10% - 20% Missing Values	
6.8% ( 3 of 44 variables)	have 20% - 40% Missing Values	
A1	Code of the member in the account	25.8%
A2	The relation to the household head	25.8%
A6	Sex	25.8%
0.0% ( 0 of 44 variables)	have 40% - 99% Missing Values	
0.0% ( 0 of 44 variables)	have 100% missing values

# **Data and Variable Label Problems**Part 3

The materials provided by the Principal Investigators were insufficient to conclusively determine the meaning of all of the variables and values in this study. This is a list of problems or potential problems identified by the ICPSR processor. Where it is relevant, the action taken by the processor (such as marking inappropriate values as missing) is also listed.

Variable Names in Datafile	Variable Names in Codebook	Problems Identified
code_p, a1		Each family seems to have an extra case at the end
		labeled "99" which has no data except for this label.
		These were probably meant to function as family
		separators.
various		The questionnaire says that missing values are coded as
		1.9, but there are no instances of 1.9 values in the data.
various		The data contain zeros which don't make sense unless
		they are missing values. (They have been marked as
		missing.)
a7		It is unclear how these numbers represent dates.
ex2002		Variable not found in questionnaire.
pop2003,		These variables were not found in any questionnaire,
pop2002,		nor could they be labeled intuitively.
errtype1		
	A16, A161, A17,	These variables appear in the questionnaire amongst
	A171, A172, A173,	many variables from the part 3 dataset, but they do not
	A174, A175, A176,	appear in the data.
